

E'Loo

The One Touch Electric Toilet Seat

- One Touch design for ease of use
- Constructed of anti-bacterial material
- Quick release mechanism for easy cleaning
- Gentle closing seat
- Designed to fit most standard UK toilets
- Dual nozzles (Offering family wash and lady wash)
- Warm air dryer
- Heated seat
- Night light
- Space saving and economical modern replacement for the traditional bidet

The E'Loo One Touch Seat has been carefully designed with the independent living sector in mind. The bidet seat is designed to fit most standard UK toilets and offers an easy to use 'one touch' system to assist users with cleaning after toileting, offering the user privacy and dignity whilst maintaining personal hygiene by

pressing only one button incorporated into the toilet seat.

The E'Loo One Touch Seat is suitable for use by both male and females and cleans intimate areas effectively. The warm water washing and drying process provides thorough cleaning and has dual nozzles for family and lady wash and also offers a heated seat to provide additional comfort to the user.

E'Loo

The One Touch Electric Toilet Seat

The E'Loo One Touch Seat has a wide range of practical and hygiene benefits to the user and offers a solution to what is often a difficult step for many people who require assistance with cleaning after toileting and wish to remain as independent as possible.

The product is fitted to the existing toilet and requires an electrical supply but does not require additional pipework as everything that is needed is incorporated into the toilet seat.

- Cleans the perineum and intimate areas effectively
- Allows the user to feel clean and comfortable, particularly if suffering from anal skin tags and haemorrhoids
- Helps to protect against skin infections in the perineum area and urinary system
- Helps with feminine hygiene during menstruation
- Improves hygiene for people with frequent bowel movements
- The two nozzle directions help cleansing of the front and posterior part of the perineum
- The combined warm water, bi-directional jets, warm air and seat enable a person experiencing difficulty in cleaning after toileting to remain independent for longer
- The unique One-Touch single button eliminates the need for a separate hand-set and is specifically designed to be easy to use, particularly for those with cognitive difficulty
