

Are you Cold & Wet on your scooter?

the  
**Scooterpac**  
canopy

 **scooterpac**<sup>™</sup>  
Lifestyle mobility products

**Fact:** The Scooterpac Canopy is stylish, made from high tech fabric that keeps you warm and dry. The high-clarity screen lets you see clearly all around - keeping you mobile in the worst of weather.

**Fact:** The Scooterpac Canopy fits to the pre-existing accessory bar on the scooter. It attaches to the arms of the seat for stability, and can be removed when the scooter comes to be sold or upgraded.

## Life is better when you have a canopy

For many people a mobility scooter is the primary way for them to move around out of the house. When the weather turns cold and wet, scooters are often packed away, leaving their owners dependent on expensive taxis or simply stuck at home.

The Scooterpac Canopy fits onto the scooter from the back, and when not in use, remains folded comfortably away. When the rain arrives, simply lift the lightweight frame over the top of the scooter and zip on the doors.

From regular scooter to fully covered in 30 seconds. What's keeping you dry?

Summer

from folded to  
open in just 30  
seconds!

Winter

# Unfolds as soon as the rain starts!

**Fact:** The Scooterpac Canopy is tested in windspeeds up to 60mph. The more aerodynamic shape, combined with advanced materials make it the safest canopy you can buy.

## Regular or XL Versions

If you'd like to attach the Scooterpac Canopy to a larger scooter, you can opt for the XL version, which adds 130mm of extra length to the frame, without compromising the ability to fold away.

Talk to your Scooterpac retailer for a list of compatible scooters.

## Fits almost any scooter!

The ingenious fitting system of the Scooterpac Canopy allows it to attach to almost any scooter on the market, and for the rest, we supply Free of Charge converter brackets.

The Scooterpac Canopy fits without altering the scooter, and takes less than 20 minutes to install.

## Set Up in Seconds

Unfold the canopy and zip up the doors in just 30 seconds!

## Waterproof

Stay dry in even the heaviest rain and snow, maintaining your freedom all year round

## Windproof

Keep out of the wind and stay warm on the coldest days, even when it's not raining!

## *Fits all kinds of scooters!*

Fits comfortably on both 4mph and 8mph scooters, without impacting the speed or handling.

XL model available for the very largest scooters.

## ***A Canopy like you've never seen before***

The Scooterpac Canopy is unlike any canopy that you've seen before. Made with premium materials, and designed to take mobility scooters to the next level, it makes them warmer, drier and more comfortable than ever.

The high tech black cloth absorbs the sunlight even on cloudy days keeping the inside warm, with double stitched seams keeping the wind at bay. By eliminating wind chill it's common to feel a difference of 7 degrees Celsius inside a canopied scooter.

We've wind tested the canopy to 60mph, so it's at home in even the most windswept of seaside towns. The driving rain, heavy snow and gale force winds won't stop you leaving the house when you have a Scooterpac on your mobility scooter.

### **It's Warm Inside!**

Under the Canopy it's an average of 7°C warmer - even when the sun is out, you're protected from the wind.
