Alerta Deluxe Support Belt

The **Alerta Deluxe Support Belt** with leg straps is designed to assist with the safe transfer of individuals from one position to another - such as bed, wheelchair, toilet, dining transfers, or walking with the user - without the need to hold the individual's clothing or body, enabling freedom of movement and a greater sense of independence.

Alerta Deluxe Support Belt is soft and comfortable to wear when placed around the user's waist, featuring a non-slip surface inside to prevent slipping. The leg straps can be used if required or unclipped when not needed, and it features 10 firm handhold positions (six vertical looped handles and four lateral ones) to provide secure, confident handling from multiple positions.

Alerta Deluxe Support Belt is NOT for use as a device for patient lifting.

ALT-216 Medium
ALT-217 Large

KEY FEATURES & BENEFITS

> Multiple transfer type uses
> Gait training
> Promotes user independence – no physical touching
> Non-slip inside surface
> Detachable leg straps included
> Adjustable Velcro & buckle fastening

WASHING INSTRUCTIONS

> Material: 100% Polyester
> Do not dry clean
> Machine washable at up to 30°C (velcro must be closed)

INSTRUCTIONS FOR USE

The patient must be able to weight bear. Place the belt around the patient's waist, fasten at the front using the velcro, then adjust the buckle strap to the correct length and fasten the buckle strap. Using the handhold positions provided, assist the transfer of the patient using approved methods.

IMPORTANT: All patient moving and handling transfer operations should be carried out in accordance with approved patient handling techniques of individual organisations in line with training and follow a full assessment of the patient and the environment in which the process is to take place.

SIZES

ALT-216 Medium 90x12cm (to suit waist sizes: 62cm (24") to 88cm (34")
ALT-217 Large 115x12cm (to suit waist sizes: 82cm (32") to 110cm (43")
